

Hello and welcome to H. Rubin Laser Eye Centers!

H. Rubin Laser Eye Centers, LLC, is the medical division of H. Rubin Vision Centers. Our LASIK team has successfully completed thousands of LASIK procedures with exceptional results. We use only the latest proven technology available. The laser we use to perform the LASIK procedure is the VISX S4 Excimer Laser with innovative eye tracking technology. We also have the VISX Custom Vue procedure available which incorporates the newest wavefront technology.

Today you will have a free screening where we will determine whether you are a candidate for the LASIK procedure and answer any questions you may have about the procedure. This free screening will include a computer guided refraction to determine your current vision corrections, a topographical mapping of your cornea and other screening tests to determine if you are a candidate for the LASIK procedure.

If you decide to have the procedure, you may have the opportunity to do your Pre-Operative exam today (if you have had your contacts off for the prescribed time). The Pre-operative exam is a non-refundable \$125.00 fee is in addition to the final procedure cost. This Pre-operative exam will include a thorough exam by the Optometrist consisting of an eye health exam, refraction, review of health history, laboratory tests for dry eye syndrome, and any other visual tests the doctor may determine are necessary. Our LASIK surgeon is Dr. Walt Bogart, who has been doing refractive surgery since 1992 and conducted over 5000 refractive procedures.

Please read and answer the attached questions because they are an important part in helping us establish your candidacy. Thank you for choosing H. Rubin Laser Eye Center.
